

1 Mark DATUM lines and chalk out a grid

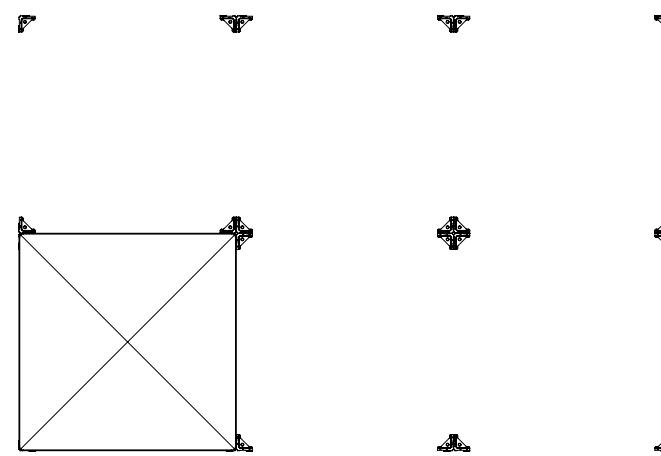

2 Supplied clip snaps as required

3 Set clips out as shown. Fix to substrate with suitable screwfixing.

4 Once clips are secured, remove any chalklines.

5 Lay out tiles, starting in the corner.

6 Finished

1 Mark DATUM lines and chalk out a grid

2 Supplied clip snaps as required

3 Set clips out as shown. Fix to substrate with suitable screwfixing.

4 Once clips are secured, remove any chalklines.

5 Lay out tiles, starting in the corner. Align the flats on the tiles with the clips.

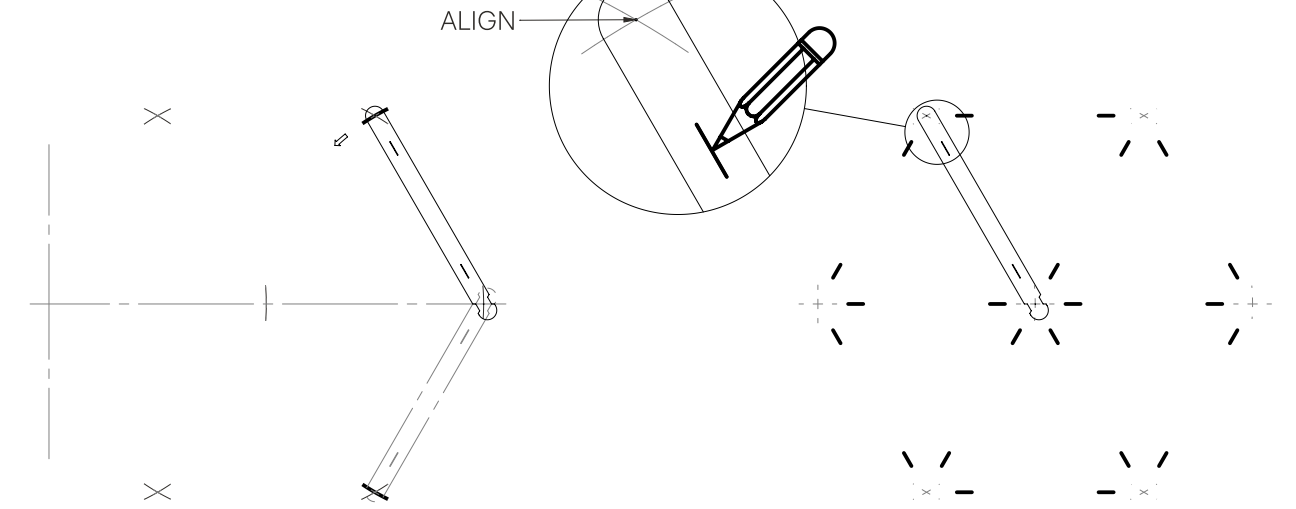

6 Finished

1 Mark datum lines. Use compass tool to scribe marks at 60°

2 Move compass to next datum intersect. Use compass tool again to scribe marks at 60°

3 Repeat step 2

4 When all points have been determined, use compass tool to mark clip locations BETWEEN POINTS

5 Supplied clip snaps as required

6 Clean unnecessary markings and set clips out as shown. Fix to substrate with suitable screwfixing.

7 Lay out tiles, be careful to align tile points.

8 Finished
